

Align-Pilates

A-Series Evolution

A2 Launched

2014

With the longest travel in the industry, a bigger carriage for greater comfort & the choice of 3 leg heights on one machine; the A2 reindexed the price & expectations for a Studio quality reformer.

A2 Revised into the A2R

April 2015

Improving the original design the A2R brought in a change to the spring bar design for easier spring selection and an additional foot bar position, going from 5 to 6 positions to benefit shorter users.

A2R fine tuned for speedy servicing

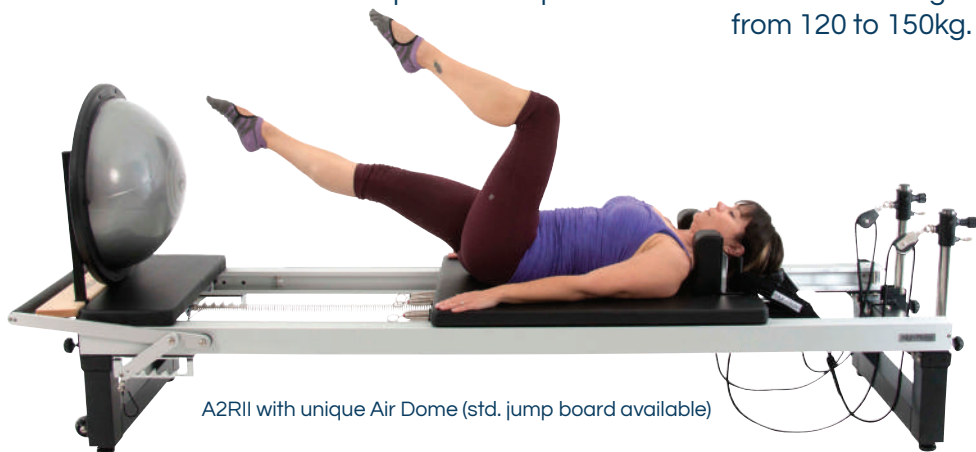

December 2015

Subtle adjustments to the carriage runner design were made to make it easy and quick to remove the reformer carriage for rapid maintenance.

A2RII Arrives

May 2016

The A2RII improved the dual rope adjustment system for faster and safer adjustments. Silent ropes, handles and foot straps were introduced as standard for a quieter & better user experience. Updated for maximum user weight from 120 to 150kg.

A2RII with unique Air Dome (std. jump board available)

Quiet Please, A2RII In Use

Feb 2017

A2RII wheel compound upgraded to European engineered plastic for a smoother and quieter ride, patented silent pulleys introduced plus a number of subtle enhancements to reduce maintenance & optimise reliability.

A8-Pro Launched

Aug 2020

The A8-Pro is launched and the A2RII is changed to a new 8 PU roller blade wheel design with new softer wheels. The 8 wheel system improves performance & decreases maintenance. Other subtle changes are made, including off-centre shoulder rests, maple pole holder & the Align-Pilates patented RC Spring Bar.
